

St Cuthbert's Swallet

The following first three lists are obvious points on a route to Sump 2 or to September Series. They are not intended to be used as a checklist, but it is possible that prospective wardens could use the first list as a checklist to 'test' their knowledge of the cave.

The lists indicate the cave's complexity and the importance of places such as Boulder Chamber as locations where several routes intersect.

The final list, the Collector's Cave, speaks for itself.
